Résumé

Ce travail porte sur

expliquer brièvement votre recherche, vos résultats marquants,...

Chapter 1

Introduction

Cette section doit comprendre l'introduction de votre travail. Il ne s'agit pas de l'introduction de votre mémoire (sauf si vous décidez de réaliser tout votre mémoire dans R Studio).

Je vous laisse les informations de base de ce template. Vous pouvez voir comment réaliser des citations des figures et des tableaux.

You can label chapter and section titles using `{#label}` after them, e.g., we can reference Chapter 1. If you do not manually label them, there will be automatic labels anyway, e.g., Chapter ??.

Figures and tables with captions will be placed in `figure` and `table` environments, respectively.

```
par(mar = c(4, 4, .1, .1))
plot(pressure, type = 'b', pch = 19)
```

Reference a figure by its code chunk label with the `fig:` prefix, e.g., see Figure 1.1. Similarly, you can reference tables generated from `knitr::kable()`, e.g., see Table 1.1.

```
knitr::kable(
  head(iris, 20), caption = 'Here is a nice table!',
  booktabs = TRUE
)
```

You can write citations, too. For example, we are using the **bookdown** package (Xie, 2018) in this sample book, which was built on top of R Markdown and **knitr** (Xie, 2015).
